1814.

Merlinus Liberatus.

AN

ALMANACK

For the Year of our Redemption,

1814,

Being the Second after *Biſſextile*, or *Leap-Year*;

And from the Creation of the World, according to the beſt Hiſtory, 5761,

And the 126th of our Deliverance by *K. William* *From Popery and Arbitrary Government*;

But the 136th from the

Horrid, Popish, Jacobite Plot.

Wherein are contained all Things fitting and uſeful for ſuch a Work; as an Ephemeris of the daily Motions of the Planets, with their various Configurations, Aſpects, Conjunctions; Lunations, Eclipſes, Aſtronomical, Aſtrological, Meteorological Obſervations, the riſing and ſetting of the Sun, Moon, Planets, and fixed Stars, illuſtrated with Tables of the Tides, Terms, and daily Equation of Clocks; Length of the Break, Increaſe and Decreaſe of Days, Semidiurnal and Seminoctural Arches for ſeveral Latitudes; a Chronology; Remarks on the Eclipſes of the Heavens, with Judgments of the Eclipſes and Seaſons, [illegible] cording to the Rules of the Ptolomean Aſtrology; with [illegible] Things relating to the Truth of Aſtrology.

Calculated for the Meridian of LONDON, ALMANACK 18 [illegible] 14

by JOHN PARTRIDGE.

——— *Etiam Mortuus loquitur.*

LONDON.

Printed for the COMPANY of STATIONERS,

By WILLIAM THORNE, Red Lion Court, Fleet Street.

And Sold by GEORGE GREENHILL, at their Hall, *Ludgate Street.*

[Price ſtitched One Shilling and Ten Pence.]

January hath XXXI Days.

Another Year now cometh on,
Oh! (honeſt Reader) think upon
That Mercy which hath Thee befriended,
Until the former Year was ended.

VENUS is an Evening Star till March 12; and then a Morning Star to the End.

Now Lent is in, you muſt abſtain
From eating Fleſh, as what is vain!
But may indulge in Wine and Fiſh,
And all Things elſe, that Heart can wiſh.

Obfervations.

The Minds and Thoughts of many People are full of Expectation of great Matters, of what may be brought forward this Seffions of Parliament.

The Heavens and Stars do at once both smile and frown upon the Actions of Mankind.

1 A great Eclipfe of the Sun - 1764
8 Edw. IV. died 1483
8 Pr. of Wales m. 1795
11 W. & M. cro. 1689
14 Handel died 1759
16 Batt. of Cullo. 1746

23 Shakefp. died 1616
27 Dunkirk dem. 1714
30 Bat. Fontenoy 1745

For Thee, sweet Month, the Groves green Liv'ries wear,
If not the first, the fairest of the Year;
For Thee, the Graces lead the dancing Hours,
And Nature's ready Pencil paints the Flowers.

Observations.

From various Configurations of the Planets, they seem to portend, that in many Parts of *Europe*, as well as some other Parts of the World, there will be Meetings and Consultations of some very high Matters. — I hope it may be for good.

1 Dryden died 1700
4 Hen. VI. murdered 1471
14 Anne Boleyn beheaded 1504
17 D. of Marlborough died 1722
— Princs. of Wales born 1768
19 Battle of La Hogue 1692
27 J. Calvin died 1554

June hath XXX Days.

This Month the Sun enters into the Crab.
The Days are hot,—therefore avoid a Drab;
With French Diſeaſe ſhe'll fill your Guts and Bones,
And that will fill you with ſad Sighs and Groans.

Obſervations.

Great Britain has no Occaſion to complain, conſidering the State of other Nations.

Many Ships arrive near this Time with good Cargoes, to the rejoicing of the worthy Merchants of the Honourable City of *London*.

4 The Rebellion began - 1745
6 Hen. II. died 1189
Edw. VI. died 1553
Sir T. Moore beheaded - 1535
7 Edw. I. died 1307
9 Czar Peter murdered - 1762
13 Peace of Utrecht - 1713
17 Cape Breton taken - 1745
24 Gibraltar taken 1704
29 Spaniſh Armada defeated - 1588

The Days are long, the Weather warm;
A Sweat at Work will do no Harm:
If my Advice is not forgot,
Drink no ſmall Beer when you are hot.

Observations.

The People in general are full of Fears and Complaints, and we may expect to hear of some eminent Actions upon the Theatre of the World. Some News from the North near this Time, of the ill Success of a Treaty which hath been some considerable Time in Debate.

3 Cromwell died 1658
5 Bp. Bonner died 1569
8 Geo. III. and Char. wedded 1761
11 Wm. the Conqueror died 1087
16 Geo. I. landed 1714
21 Edw. II. murdered - 1327
29 Richard II. deposed 1399

A great Comet appeared in this Month, and in Oct. Nov. and Dec. - 1811

The Sportſmen keen do now prepare
To hunt the Fox, or tim'rous Hare;
And if by Day they find no Sport,
A Fox at Night requites them for't.

Cold Winter comes—now Wine is good,
To cheer your Heart, and warm your Blood;
Remember too (if you are able)
That Store of Victuals crown your Table.

A TABLE of TERMS and RETURNS.

Hilary Term begins *January* 24, ends *February* 12.

Returns or Eſſoign Days.	Exc.	Ret.	App.	W. D.
In eight Days of St. *Hilary*, - - *January* 20	21	22	24	*Mond.*
In fifteen Days of St. *Hilary*, - - - - 27	28	29	31	*Mond*
On the Morrow of the Purif. of bl. V. *M. Feb.* 3	4	5	7	*Mond.*
In eight Days of the Purif. of bl. V. *Mary*, 9	10	11	12	*Satur.*

Eaſter Term begins *April* 27, ends *May* 23.

In 15 Days of *Eaſter*, - - - - *April* 24	25	26	27	*Wedneſ.*
From the Day of *Eaſter* in 3 Weeks, *May* 1	2	3	4	*Wedneſ.*
From the Day of *Eaſter* in 1 Month, - - 8	9	10	11	*Wedneſ.*
From the Day of *Eaſter* in 5 Weeks, - - 15	16	17	18	*Wedneſ.*
On the Morrow of the *Aſcenſion*, - - - - 20	21	22	23	*Monday*

Trinity Term begins *June* 10, ends *June* 29.

On the Morrow of the holy *Trinity*, *June* 6	7	8	10	*Friday.*
In eight Days of the holy *Trinity*, - - 12	13	14	15	*Wedneſ.*
In fifteen Days of the holy *Trinity*, - - 19	20	21	22	*Wedneſ.*
From the holy *Trinity* in 3 Weeks, - - 26	27	28	29	*Wedn ſ.*

Michaelmas Term begins *Nov.* 7, ends *Nov.* 28.

On the Morrow of *All Souls*, - - - *Nov.* 3	4	5	7	*Monday.*
On the Morrow of St. *Martin*, - - - - 12	13	14	15	*Tuesday.*
In eight Days of St. *Martin*, - - - - 18	19	20	22	*Tuesday.*
In fifteen Days of St. *Martin*, - - - - 25	26	27	28	*Monday.*

N. B. No Sittings in *Weſtminſter-Hall* on the 2d of *February*, *Aſcenſion Day*, and *Midſummer Day*.

The Exchequer opens Eight Days before any Term begins, except Trinity, before which it opens but Four Days.

Note, That the firſt and laſt Days of every Term are the firſt and laſt Days of Appearance.

OXFORD and CAMBRIDGE TERMS.

OXFORD TERMS.

Lent Term - -	begins *January* 14, -	ends	*April*	2.
Eaſter Term -	begins *April* 20, - -	ends	*May*	28.
Trinity Term -	begins *June* 1, - -	ends	*July*	9.
Michaelmas Term	begins *October* 10, - -	ends	*Dec.*	17.

The Act is *July* 5.

CAMBRIDGE TERMS.

Lent Term - -	begins *January* 13, - -	ends	*April*	1.
Eaſter Term - -	begins *April* 20, - -	ends	*July*	1.
Michaelmas Term	begins *October* 10, - -	ends	*Dec.*	16.

The Commencement will be *July* 5.

A Table of the Moon's Age for every Day throughout this Year, whereby, with the Help of the next General Tide Table, the Times of High Water at all the Places mentioned above it are shewn by Inspection.

An Explanation of this and the following Table.

First find the Month on the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Column is the Time of High Water at all the Places above mentioned, by Inspection.—*Example, Feb.* 3, I find the Moon to be 13 Days old, and over against 13 in the 1st Column I find, 10 h. 2 m. in the 2d Column, 11 h. 54 m. in the 3d; which are the Times of High Water at all those Places mentioned above in the 2d and 3d Columns on that Day. *Et sic de cæteris.*

N. B. In the Calendar Part you will find the Planets Southing inserted to several Days in each Month; and by this Table you may easily find their Rising and Setting: First, find the Longitude for the Day proposed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting, but subtracted the Rising.

A Compendious Chronology of the moſt principal Epochas and Æras, with their Beginnings, reduced and fixed to the Years of the Julian Period, the Creation of the World, and to the Years before and after Chriſt.

	Julian Period	Anno Mund	Ante Chriſt

ROYAL FAMILY, &c.

BIRTH-DAYS of the ROYAL FAMILY.

KING GEORGE III.	June 4, 1738	Prs. Elizabeth,	May 22, - 1770
Queen Charlotte,	May 19, 1744	Duke of Cumberland,	June 5, 1771
Prince of Wales,	Aug. 12, 1762	Duke of Suſſex,	Jan. 27, 1773
Duke of York,	Aug 16, 1763	Duke of Cambridge,	Feb. 24, 1774
Duke of Clarence,	Aug. 21, 1765	Princeſs Mary,	April 25, - 1776
Ds. of Wirtemberg	Sept. 29, 1766	Princeſs Sophia,	Nov. 3, - 1777
Duke of Kent,	Nov. 2, - 1767	Princeſs of Wales,	May 17, 1768
Prs. Auguſta Sophia,	Nov. 8, 1768	Pr. Charl. of Wales,	Jan. 7, 1796

SOVEREIGNS of EUROPE, their Acceſſion, &c.

Kingdoms, &c.	To whom ſubject.	When born.	Began to reign.
England, &c.	George III.	June 4. 1738	Oct. 25, 1760
Ruſſia	Alexander	Dec. 28, 1777	Mar. 24, 1801
Spain	Ferdinand VII.		1808
Portugal	Maria	Dec. 17, 1734	Feb. 24, 1777
Pruſſia	Fred.-Wm. IV.	Aug. 6, 1770	Nov. 16, 1797
Denmark & Norway	Frederick VI.	Jan. 27, 1768	Mar. 13, 1808
Sweden	Charles XIII.	Oct. 7, 1748	June 6, 1809
Auſtria	Francis II.	Feb. 12, 1767	Mar. 1, 1792
Popedom	Pius VII.	Aug. 11, 1742	Mar. 14, 1800
Sardinia	Victor-Emanuel	May 24, 1751	June 4, 1802
Ottoman Empire	Mahmud	July 20, 1785	July 28, 1808
Two Sicilies,	Ferdinand IV.	Jan. 12, 1751	Oct. 5, 1759
France, &c.	Napoleon	Aug. 15, 1769	Dec. 15, 1799

The FULL WEIGHT of the COINS, with the LEAST WEIGHT allowed to paſs of the Gold Coin.

GOLD.	Wt. allowed. dwt. gr.	Full Wt. dwt. gr.
Guinea	5 8	5 9 3/8
Half Guinea,	2 16	2 16 6 4/8
Third of Guin.	1 19	1 19 1 7/8

SILVER.	Full Wt. dwt. gr.
A Crown,	19 8 16/31
Half Crown,	9 16 8/31
Shilling,	3 20 28/31
Six Pence,	1 22 14/31

According to the above proportions it appears, that the value of a *lb.* of ſilver is 62s. or 3l. 2s. and of a *lb.* of gold is 44½ guineas, or 46l. 14s. 6d. Alſo that the *oz.* of ſilver is 5s. 2d. and the *oz.* of gold 3l. 17s. 10½d. So that the value of the ſtandard gold is 15 times that of the ſilver, and 14 more.

ECLIPSES
OF THE
SUN and MOON,
That will happen this Year, 1814.

Within the Compaſs of this Year there will happen only Three Eclipſes; Two of the SUN, *and One of the* MOON; *they will happen in the following Order, as they were computed from very exact Tables of the Sun and Moon, founded on the Newtonian System of Gravitation, which Tables are found wonderfully to agree with Observations.*

THE firſt of theſe Eclipſes is of the Sun, and happens on Friday, the 21ſt Day of January, at 13 Minutes paſt our Two o'Clock in the Afternoon; but notwithſtanding the Sun is above our Horizon at the Time, the Eclipſe will be inviſible to us, and not to us only, but to all Europe. The Reaſon of which is, the Moon at that Time has only about One Minute of North Latitude, ſo that in theſe Northern Parts of the Earth, the Moon's Parallax in Latitude will depreſs the viſible Place of her Centre more to the South, than is the Space taken up by the Sum of the Semidiameters of the Sun and Moon taken together; but in the Southern Parts of the Globe, this will be a very great Eclipſe, for it will be both central and annular, that is, a bright Circle of Light will appear round the Moon's dark Body on every Side, very beautiful to behold; and this Appearance will be at their 12 o'Clock at Noon, under 18 Degrees 38 Minutes of South Latitude, and 33 Degrees 19 Minutes of Weſt Longitude from London; which Place falls in the great Southern Atlantic Ocean, near the Eaſtern Coaſt of the Country of Brazil, in South America. This Eclipſe will be ſeen, more or leſs in Quantity, to all South America, and I expect will alſo extend itſelf to ſome of our Weſt India Iſlands.

The Second is another great Eclipſe of the Sun, on Sunday, the 17th Day of July, at 26 Minutes paſt our 6 o'Clock in the Morning; the Moon's true Latitude at this Time, I find to be about 10 Minutes to the North;

yet owing to her Parallax in Latitude, which will depreſs her ſo far to the Southward, as to render this Eclipſe like the former, inviſible to us, eſpecially under the Meridian and Latitude of London; but in the more Eaſtern Parts of the Globe, it will be a very great Eclipſe, in ſo much, as to be total for two or three Minutes in ſeveral Parts of Aſia; for, by my Computations, I find in 30 Degrees 51 Minutes of North Latitude, and 84 Degrees 12 Minutes of Eaſt Longitude from London, the Sun will be totally and centrally eclipſed on the Meridian, or preciſely at their 12 o'Clock at Noon; which Place falls about 156 Miles to the Eaſt of the Town of Sirinagur, ſituated in a large rugged Country of the ſame Name, between Hindooſtan Proper and Thibet, bounded on the North and North-Eaſt by the Thibetian Mountains. The Sun will be ſeen eclipſed, more or leſs, in ſome Parts of Tartary, and to the Southward, as at Calcutta, Madras, and at Bombay on the Malabar Coaſt.

The Third and laſt Eclipſe of this Year, is a partial one of the Moon, on Monday Night, the 26th Day of December; and may be ſeen by us in this Kingdom, if the Air prove favourable, and not by us only, but alſo by the Inhabitants of all the States and Kingdoms in Europe and Africa, together with the Weſtern Parts of Africa, and the Eaſtern Parts of America; but in Siam, China, Chineſe Tartary, &c. in the Eaſtern Parts of Aſia, the Fore-part only will be viſible, the Moon ſetting with them before the Eclipſe be over, as appears by conſidering her Poſition, in reſpect of thoſe Parts of the Earth during the Time of the Eclipſe; for at the Beginning ſhe is vertical to the Kingdom of Nubia in Africa, among the Sandy Deſarts, under 22 Degrees 33 Minutes of North Latitude; 30 Degrees 18 Minutes Eaſt from London. At the Time of the Middle, the Moon is vertical to that ſandy and burning Deſart of Bilma, lying to the North of that extenſive Country of Bornow, in Africa, 13 Degrees 16 Minutes Eaſt from London; in 22 Degrees 36 Minutes North Latitude. At the End of this Eclipſe the Moon poſſeſſeth the Vertex of that Part of the Sandy Deſart of Zanhaga, in Zahara, whoſe Latitude is 22 Degrees 40 Minutes North, and its Longitude 3 Degrees 48 Minutes Weſt from London. The Moon will riſe eclipſed to the Iſland of Jamaica in the Weſt Indies.

The Time and Manner of Appearance, in reſpect to us in this Kingdom, will I hope not greatly differ from the following Type and Calculation.

Dec. 26th	*London.*			*York.*			*Edinburgh.*			
At Night.	h.	m.	f.	h.	m.	f.	h.	m.	f.	
Beginning	9	56	0	9	51	29	9	43	11	App. T.
Eclip. Opp.	10	59	40	10	55	9	10	46	51	
Middle -	11	7	15	11	2	44	10	54	26	
End - -	12	18	30	12	13	59	12	5	41	

	h.	m.	f.
Whole Duration - - -	2	22	30
Digits eclipſed - - -	5°	50′	30″

N. B. The Time of this Eclipſe will be nearly the ſame at Cambridge and Royſton, as it is at London, both being nearly under the ſame Meridian. At Oxford the Time of this Eclipſe will be 5 Minutes ſooner than at London.

The beautiful Planet Venus will make a brilliant Appearance in the Weſt during the Month of January; being at a conſiderable Diſtance from the Sun, ſhe will therefore ſet late at Night,—Venus being now our bright Evening Star.

The Planet Jupiter comes to an Oppoſition of the Sun, the 24th of February, becoming then our Evening Star in the Eaſt; and from the Beginning of that Month until the End of May, may be ſeen every Night, beautiful to behold; and when the Air is clear, will afford to the Aſtronomer, as well as every other Perſon, ample Opportunities to gratify their Curioſity in viewing him with their Teleſcopes, to obſerve the Configurations of his four Moons or Satellites, which are often a beautiful Sight. Jupiter, when neareſt the Earth, is not leſs than Four Hundred Millions of Miles from us, and not leſs than Four Hundred and Ninety-Five Millions of Miles from the Sun.

Then, far remote from Day's all-cheering Source,
Large *Jupiter* performs his conſtant Courſe;
Four friendly Moons, with borrow'd Luſtre riſe,
Beſtow their Beams benign, and light his Skies.

N. B. We ſaw at Royſton the latter Part of the Sun's Eclipſe, *Feb.* 1*ſt*, 1813, but it was often cloudy; Mr. Andrews's Delineation of it, as given in Moore's Almanack, appeared to be exactly right. We alſo obſerved the Occultation of *Aldebaran* by the Moon, the 8th of *March*, the ſame Year; it was a very fine Evening; the Immerſion and Emerſion was obſerved with a good Teleſcope, and was found to agree with the Calculation within at leaſt Half a Minute.

I ſhall this Year add ſomething concerning the Foundation, Vindication, and Limitation, of that moſt heavenly and ſublime Science, ASTROLOGY.

ASTROLOGY is an Art whereby future Events are foreknown by their proper natural Signs and Cauſes, being no other than the Hiſtory of Natural Accidents, which will, in a certain Period of Time, by ſome known Cauſe, be produced. Now theſe Cauſes are chiefly the Sun, Moon, and other Planets, together with the Conſtellations of Heaven, as God himſelf is pleaſed to teſtify, ſee *Gen.* i. 14, where you meet with theſe Words; And God ſaid, Let there be Lights in the Firmament of Heaven, to divide the Day from the Night; and let them be for Signs and for Seaſons, and for Days and for Years. Here you ſee they are ordained

for Signs, that is, Tokens foreſhewing ſome Accident in Time to be produced; and that they are the Cauſes of ſuch Accidents, ſee *Job* xxxviii. 31, 32, where God, treating with *Job*, asketh theſe words; Canſt thou bind the ſweet Influences of Pleiades (the 7 Stars) or looſe the Bands of Orion? Canſt thou bring forth Mazzaroth in his Seaſons? or canſt thou guide Acturus with his Sons? Which plainly ſhews the Stars to be Cauſes of ſuch accidental Mutations and Changes, as we weakly term them, elſe why ſhould God enumerate the reſtraining of their Influence amongſt his Works of Wonder? and that they are ordained for that End, namely, by their Influence, to order and diſpoſe the Affairs of this inferior World, not only Authority of Scripture, but natural Reaſon, yea even daily Experience doth ſufficiently confirm; for to what End, I pray you, ſerve the various Motions of the Planets, Appearance of Comets at certain Seaſons, the Full and Changes of the Moon, &c. If they were created only to give Light by Night, as ſome People would perſuade the World they were, I hope they will not pretend that their diſappearing for ſeveral Nights, nay Months, eſpecially the Moon, which, for a third Part of each Revolution, makes little or no Appearance, is a Defect or Over-ſight of their Creator, by whoſe Almighty Power, and All-wiſe Decrees, they were framed, and ordered thus to move; but in caſe they ſerve for no other End than that, namely, to give Light by Night, it muſt of Neceſſity be thus concluded which to affirm were the higheſt Blaſphemy. Yet who even amongſt the wiſeſt of our Adverſaries can deny, but that had the Planets, eſpecially the Moon, which in this reſpect is the principal of them, her Light being ſo manifeſt; that had they, I ſay, been ſo placed as to have appeared at the Sun's Departure, they would, to much greater Perfection, have performed that Office; therefore it muſt of Neceſſity be allowed, that the Planets and Stars were created for a more noble End, than barely to give Light upon the Earth; which, would my Room permit, I could abundantly prove, by my own Experience, in ſundry Inſtances of Peace, War, Plenty, Scarcity, Sickneſs, &c. but I ſhall content myſelf at preſent with theſe few and undeniable Proofs following, which are obvious to the Eyes of any unprejudiced Perſon, namely, when Saturn beholds

the Sun, or Mars Venus, either by Quartile or Oppoſition, or be joined with them from or in watery or airy Signs, they are generally attended with windy, and for the moſt Part very wet Weather; and if other ſtrong Teſtimonies contradict not, may certainly be relied on. And who can deny the Influence of the Moon over all Human Bodies? Do not the Tides ebb and flow, increaſe or diminiſh, as that Luminary doth increaſe or decreaſe in Light? Nay, they even come and go, as it were, at her Command; and ſuch is her powerful Dominion over Human Bodies, that any one of the Female Sex, be ſhe ever ſo ignorant, if her Age do but reach the Teens, is capable of unfolding this Myſtery. Thus having made it appear, that the Stars are both Signs and Cauſes of ſublunary Mutations and Changes, I come next to ſhew after what Manner, and by what Means, we attain to the Knowledge thereof.—It was not in ſo ſhort a Time as one, two, or three Centuries of Years, that Man attained to ſo perfect a Knowledge in this divine Art, as to foreſee Wars, Peace, Plenty, Scarcity, &c. but by the diligent Obſervations of many Ages, comparing the Events of one Century with thoſe of another, and both with the then impending Configurations of the Celeſtial Harbingers, was found out the natural Diſpoſitions of each Planet and Sign; by a long Series of Obſervations, I ſay it was, that the World diſcovered one Planet to be the Propagator of Cold and Drought; another Heat and Moiſture; a third, hot and burning; this of an equal Temperament, that increaſing Moiſture, whilſt another is convertible to either; and all theſe active Qualities augmented or diminiſhed in this or that Part of Heaven, with this or that fixed Star or Conſtellation. — Thus having diſcovered the natural Quality of each Planet and Sign, by the Accidents, Mutations, and Changes of the World, Temperaments, and Habits of Men; and having, by Aſtronomical Obſervations, found out the juſt Period of each Planet's Revolution through the Zodiack; being thereby enabled to behold, as it were, at a Diſtance, the Poſitions of the Planets, and how Configurations, that is to ſay, in what Part of the Zodiac, and with what remarkable fixed Star each Planet would be placed, at the End of a Month, Year, or what Diſtance of Time any Perſon was pleaſed to appoint; as alſo

in what Part of Heaven each Planet would be located, whether in the East or West, above or under the Earth, and with what Aspect they would at any such Time behold each other; also what Hour of the Day they would rise, culminate, or set.—Being, I say, qualified to discover these and the like Particulars, they then found it no hard Matter to attain to a Foreknowledge of the several Accidents which at that Time would, in all probability, shew themselves.—For that Man who by the Accident can discover the Cause, before unknown, may, with much more Ease, discover the Accident by the known Cause; and this and no other is the Ground from which all the Sons of Urania deduce their rational Predictions; these are the Practices which so many exclaim against as diabolical Sorcery and Witchcraft; these are the juggling Cheats so much exploded by those very Persons who, at the same Time, do not scruple to practise the like Prognostics. For who of all these, our Condemners, seeing a Person of a slow aukward Pace, with a dark, cloudy, morose Aspect, doth not condemn him for a surly, ill-natured, covetous Fellow?

(To be continued.)

Judicium Astrologicum, pro Anno 1814.

Or, an Astrological Judgment upon the Four Quarterly Ingresses of the present Year; and First, of the Brumal Ingress, or Winter Quarter.

THE Winter Quarter begins when the *Sun* enters the Tropic of *Capricorn*, which this Year happens on *Wednesday*, the 22d of *December*, 1813, at 10 min. past 4 o'Clock in the Morning; at which Time 14 Deg. of ♏ will ascend in the East, and the first Degree of *Virgo* will be upon the Meridian —All the Planets I find are under the Earth, excepting *Jupiter*, which will be at that Time nearly full South, and very nearly in Opposition to the Planet *Mars*, which is posited in the lower Angle of the Figure.—The ☽ ad □ of ♂, ad vac. ☌ of the *Sun*. In taking a View of this Figure of the Heavens, and

conſidering the Poſitions and Configurations of the Planets, it appears that there will be in this Quarter many great Councils and Conſultations held, in the different Courts of *Europe*, and perhaps it may be on the Subject of Negociation and Peace, and change of Iſlands, or concerning ſome Alterations in States and Kingdoms; if this in ſome Meaſure has not been done already, at leaſt there is ſome Reaſon to expect it, during the Courſe of the enſuing Year, as I find the Planets are more harmonious among themſelves, by Trine and Sextile Aſpects, than they have been for ſome Years paſt; and which I would hope will incline Men's Minds to Peace and Concord alſo. However, I expect ſome Overtures for Peace, from ſome of the Powers at War connected with *Great Britain*.—I expect ſome great Deſigns and Actions are on Foot, or may be ſo in a few Months, upon the Continent of *Europe*, as in *Pruſſia*, *Holland*, *France*, *Germany*, in *Spain* and *Portugal*; the Northern Powers, ſuch as *Sweden*, *Ruſſia*, and *Denmark*, will be taken up in theſe Conſultations and Deſigns; however, there ſeems to be ſomething that will be carried on; but Time muſt produce the Particulars.—The two malevolent Planets, *Saturn* and *Mars*, will come to a Square Aſpect, on the 4th of *February*, from the Signs *Capricorn* and *Aries*, which is the moſt rugged Aſpect in this Quarter, and will produce Broils and Diſcontents; it ſeems, I think, to point at the *Ruſſians*, *Tartars*, and ſome *German* Princes; but I ſtill ſay, *Great Britain* has nothing to fear from the *French*, her worſt Enemy, if ſhe is but juſt to herſelf.—It alſo ſeems that Buonaparte, though he has been harraſſed and preſſed hard on every Side, and involved by the ſurrounding Powers at War into great Difficulties and Diſtreſs, ſtill ſeems to brave all his Opponents; yet I think the Eyes of all the Powers of *Europe* have been opened within this Year or two, as to cauſe them to make great Struggles, to overcome the Vaunts and Menaces of the *French* Government.—It alſo ſeems the United States of *America* will be much agitated by War, Broils, Diſcontents, &c.

THE SPRING QUARTER,

Or, the Sun's Tranſit through ♈, ♉, and ♊.

THE Spring Quarter begins when the *Sun* enters the Equinoctial Sign *Aries*, which will this Year happen on *Monday*, the 21ſt of *March*, at 37 min. paſt 5 o'Clock in the Morning, when 17 Deg. of ♓ are aſcending in the Eaſt, and 25 Deg. of ♐ will be on the Mid-Heaven.—The *Moon* in the Aſcendant, applying to a Conjunction of the *Sun* in *Aries*, and departing from a Conjunction of *Venus*, and next applying and beholding the Planet *Saturn* with a Sextile Aſpect. Now the firſt Thing to be noticed at this Ingress is, the Poſition of the *Sun*, *Moon*, and *Mercury*, in the Eaſtern Angle of the Figure, from all which I ſhould ſuppoſe ſome Negociations may be going forward, tending to reſtore to the diſtreſſed Countries the Bleſſings of Peace; but yet I am afraid, according to what I can ſee from the Figure, that the Luſt of Ambition, and the Rage of Revenge, will continue to diſtract and diſturb many Parts of *Europe*, including *Great Britain*, as connected with the reſt of *Europe*, by the reſtleſs Ambition of the Government of *France*, as well as ſome other Powers that are at War.—This, like former Years, is likely to be a very buſy Year with all the *European* Powers, and many will fall under great Troubles, on account of haſty and raſh Proceedings, which I expect will be the Caſe with the United States of *America*, if a Negociation for Peace has not by this Time ſucceeded, and that under the Influence of the Trine Aſpect of *Jupiter* and *Saturn*, which takes Place this Year; I am doubtful of its being concluded (I mean a General Peace) for ſome Time yet to come, as the approaching Oppoſition of *Saturn* and *Mars*, from Tropical Signs, will ferment the Minds of Men ſo much, that their Paſſions will run high, and will, I fear, not be eaſily reduced to Reaſon; which has been too much the Caſe for many Years back, and have been the Occaſion of all our Wars and Troubles.—Much might be ſaid, had I Room, from this Figure of the Heavens at this Ingreſs, concerning the general Tranſactions of the World; but I ſhall only obſerve in particular, that ſome

great Changes, in the ſeveral Parts of *Europe*, are drawing on, the Providence of the Almighty doth ſo order Celeſtial Influences, by his immutable Decrees, that exceſſive Tyranny muſt, at laſt, yield to Juſtice and Moderation.

The SUMMER QUARTER,

Or, The Sun's Tranſit through ♋, ♌, *and* ♍.

THIS Quarter begins when the *Sun* enters the firſt Point of the Tropical Sign *Cancer*, which, by my Calculations, happens this Year on *Wednesday*, the 22d of *June*, at 10 min. paſt 3 o'Clock in the Morning; at which Time 15 Deg. of ♒ are upon the Meridian, and 21 Deg. of ♊ upon the Cuſp of the Aſcendant. The ☽ ab □ of ☿. The moſt material Aſpects at this Ingreſs are, an Oppoſition of *Saturn* and *Mercury*, and an Oppoſition of *Saturn* and *Mars* from Tropical Signs, which Oppoſitions will be of great Importance to many Places, Kingdoms, and Countries, such as *Ruſſia*, *Sweden*, *Denmark*, with *France*, *Great Britain*, and ſeveral Parts of *Germany*; its Effect will alſo extend itſelf into the Southern Parts of *Europe*, and alſo Weſtward to the United States of *America*.—This Oppoſition of *Saturn* and *Mars* ſtimulates ſome great Changes and Alterations in the World, with Broils and Diſcontents; with Wars and Effuſion of Human Blood, where Armies are on Foot.—As to *France*, I think ſhe is ſick of an Ulcer in her own Bowels. The Spirit of God is performing Wonders in all Nations, in order to bring about that great Work of Reformation, which we are now waiting for and daily expecting.

The AUTUMNAL QUARTER,

Or, the Sun's Tranſit through ♎, ♏, *and* ♐.

THIS Quarter begins when the *Sun* enters the Equinoctial Sign *Libra*, making our Days and Nights once more equal, which this Year happens on *Friday*, the 23d Day of *September*, at 55 min. paſt 4 o'Clock in the Afternoon, when 23 Deg. of ♒ aſcend in the Eaſt, and 15 Deg. of ♐ are on the Mid-Heaven. The ☽ ab ☌ of ♄,

et △ of ♅, et △ of *Mars*. In a few Days after happens the famous Trine Aſpect of *Jupiter* and *Saturn*; and juſt before theſe was a Conjunction of *Jupiter* and *Mars* in *Virgo*, the Aſcendant of *France*; and what is rather remarkable, theſe Planets occupy at this Ingreſs the Weſtern Angle of the Figure, and they are but juſt above the Earth; the *Moon* in an exact Conjunction of the Planet *Saturn*, in the 12th Houſe of the Figure, and in *Capricorn*. Some of theſe Aſpects are of a very promiſing Import, as if Things were drawing on for the better; I wiſh it may turn out to be ſo. — Some Countries may obtain Peace, and *England* may gain ſome Advantages, yet no General Peace is likely, I doubt, to take Place; for the Political Affairs of *Europe* ſtand as yet very unſettled, and in a very uncertain Poſture. The Effects of the late *Comets* are not yet over; nor will, I apprehend, for ſome Years yet to come.

FINIS.
